

G-Med™

Safety Hypodermic Needle

Product Data & Information

- ▲ G-Med™ safety needles are available in the following needle gauges: 18, 19, 20, 21, 22, 23, 25, 26, 27, 29, and 30 Gauge; with a range of needle lengths from ½" to 1 ½".

- ▲ G-Med™ safety needles contain no rubber latex, they are non-toxic, pyrogen free, and single use.

- ▲ G-Med™ safety needles are individually wrapped in a peel apart, ISO needle color-coded package, which is marked with a Lot number and expiration date.

How to use the G-Med™ Safety Needle for Luer Lock or Luer Slip Syringes:

01. Attachment

- ▲ Step 01: Securely attach needle onto a Luer Lock or Luer Slip syringe.
- ▲ Step 02: Pull the safety cover back away from the needle and toward the syringe barrel.
- ▲ Step 03: Grasp the syringe with one hand and with the other hand pull the clear needle shield straight off.

02. Aspiration

- ▲ Draw up medication as per your established protocol.
- ▲ NOTE: Changing of needles is possible, use established institutional protocol; do not activate safety cover until after the injection has been given, prior to removing the needle from the syringe.

03. Injection

- ▲ Administer medication in accordance with established protocol.

04. Activation

- After injection, immediately activate safety cover as follows:
- ▲ Without changing hand position, move the cover to a halfway position with a finger motion then activate by depressing on a flat surface. An audible click indicates the safety mechanism has been activated.
Or
 - ▲ Push the safety needle cover forward toward the needle until you hear and/or feel it lock. Visually confirm that the needle tip is covered.
 - ▲ Discard after single use in an approved sharps container.
